

Sezgi Altan *Software Developer*

📍 Antalya, Turkey ✉ szqii.altn@gmail.com ☎ (+90) 536 074 23 83 🔄 /Szqii 🔗 /in/sezgi-altan/

Profile

Product-Minded Software Engineer with a strong background in frontend architecture and cross-platform mobile development. Experienced in building scalable applications at global companies.

Former agency co-founder with a unique ability to bridge the gap between technical execution and business goals. Passionate about open-source contributions, design systems, and delivering user-centric digital experiences.

Skills

Languages — JavaScript (ES6+), TypeScript

Frontend — React.js, Vue.js, HTML5, CSS3/SASS, Tailwind

Mobile — React Native, Flutter

Testing & Tools — Jest, React Testing Library, Git, Webpack/Vite, CI/CD Principles

Design & Architecture — Design Systems, Responsive Design, UI/UX Collaboration

Professional Experience

Viseon Studio, *Lead Software Engineer & Founder* 2025 – 12/2025
Antalya, Turkey

- **Established and led the technical strategy** for a creative media agency, overseeing the end-to-end development of digital solutions for diverse clients.
- **Architected and built the agency's core web infrastructure** from scratch, handling everything from frontend performance (UX/UI) to backend deployment.
- Translated complex client requirements into technical roadmaps, ensuring the delivery of high-quality digital products that aligned with business goals.

FactSet , *Software Engineer* 11/2023 – 07/2025
Norwalk, USA | Remote

- Developed and maintained interactive dashboards using **Vue.js**, and actively participated in the core migration from **Vue 2 to Vue 3**. Utilized **Composition API** and modern data visualization techniques to deliver high-performing, seamless user experiences.
- Contributed to the design and implementation of pixel-perfect UI improvements, playing a key role in the visual redesign and usability enhancement of the dashboard.
- Actively collaborated on FactSet's open-source project **Stach** , both by contributing code and integrating it into production-level applications.
- Ensured high-quality, maintainable code while collaborating in an agile, cross-functional team focused on performance, scalability, and user satisfaction.

simpliers , *Frontend & Mobile Developer* 01/2023 – 11/2023
Denizli, Turkey

- Led the end-to-end frontend development and visual overhauls for the Simpliers website using **Vue.js**, significantly enhancing the user experience for global giveaway creators.
- Designed and engineered two mobile applications from scratch: developed **Simpliers Giveaway App**  utilizing **React Native**, and **Anonym Stories for Instagram**  using **Flutter**, managing both UI and core business logic.
- Enabled seamless, cross-platform giveaway creation across web and mobile ecosystems, directly contributing to increased user engagement and retention.
- Collaborated with high-profile influencers to produce CEO-focused technical blog content and prepared weekly analytical reports for strategic management meetings.

artrodite , *Lead Software Engineer & Co-Founder* 2023 – 12/2023
Denizli

- Co-founded a 360° digital branding agency, providing end-to-end software and design services to startups and SMEs.
- **Responsible for the full software development lifecycle (SDLC)** of all internal and client projects, ensuring high performance and SEO optimization.
- Managed cross-functional responsibilities ranging from **technical implementation to project management**, delivering tailored digital identities for brands.

Jotform , UI Developer

03/2022 – 09/2022

Turkey | Remote

- Developed and maintained reusable UI components with a focus on performance, accessibility, and responsiveness.
- Collaborated closely with UX designers and frontend teams to enhance user experience across Jotform's form builder and admin interfaces.
- Contributed to design system consistency and implemented UI improvements based on user feedback and A/B testing.

Education

Pamukkale University, Bachelor of Science in Computer Engineering

2018 – 2023

GPA 3.4 / 4

Denizli, Turkey

Politechnika Śląska (Silesian University of Technology),

10/2021 – 03/2022

Automatic Control, Electronics and Computer Science (Erasmus Program)

Gliwice, Poland

Completed a semester abroad through the Erasmus+ program, enhancing academic and cultural experience while focusing on control systems, electronics, and advanced computer science topics.

Projects

Pixvie

Pixel art application that allows people from all around world paint one out of 1.000.000 pixels.

This project aims to provide psychological and sociological conclusions about what results will be achieved when society is united while people have fun and compete.

simpliers Giveaway App

React Native app of simpliers, the most used giveaway site all over the world.

Anonym Stories for Instagram

Flutter app that lets you watch Instagram stories anonymously. It is published on App Store.

React Native Tab Bar

An NPM package that creates a custom iOS-style tab bar in React Native.

Simple Roll Dice

Flutter app that roll dices easily. It includes 3D Models and animations. It is also published on App Store.

Organisations

PaüSiber , Core-Team Member

2019 – Present

PaüSiber is a community united by the goal of raising cybersecurity awareness and contributing to the development of qualified professionals to meet the country's needs.

Denizli, Turkey

Within the Paüsiber community, I both participated in and conducted trainings, as well as organized events to share my knowledge and experience with future members.

Languages

Turkish — Native/Bilingual

English — Fluent

Spanish — Basic
